Welcome to Forest Master, the UK's number one brand for log splitters, wood chippers and all related accessories.

Boasting over 30 years of experience in the industry, our lead engineers have continued to design the perfect prototypes of petrol, electric, battery and manual log splitters and manufacture them for you. You'll also find petrol and electric wood chippers and mulchers, and a variety of other must have accessories.

We make it possible to turn the laborious task of splitting that pile of logs which would normally take you many hours, into a fun and stress relieving activity. Forest Master is committed to providing exceptional service to all our customers. Our website resource section provides detailed technical advice should you need it; however, UK based experts are on hand to help with any further questions you may have.

Compact Wood Chippers

Compact Wood Chippers

Hinged hopper and chute. Stores in less space than an average wheelbarrow B5 x 95 mm drum opening Direct drive motor requires minimal maintenance

FM4DDE

The FM4DDE is a small but mighty electric chipper, with a powerful 2800 Watt electric motor which runs off standard 230 V household mains electricity. Its compact size and powerful electric motor make this ideal for domestic use.

Patented GB2100107.8 / PCT/IB2021/054494

Get ahead of the game with Forest Master's exceptional range of wood chippers, garden shredders and mulchers. Backed by gardening experts worldwide.

The range that proves bigger isn't always better. Our petrol and electric wood chippers, garden shredders and mulchers are perfect for everyday use. Designed with you in mind, they're easy to store, pick up and go. These wood chippers can handle branches up to 2 inches in diameter, with reversible forged steel blades and a direct drive design. Our chippers, shredders and mulchers are built to last.

Tow attachments are available for convenient transportation on site.* (See p. 36)

FM6DD The FM6DD features a powerful

6hp LCT engine that can rotate the chipper drum at a maximum of 3600 rpm. This enables it to comfortably chip all kinds of freshly cut hard or soft wood.

Available with an electric start engine.

FM6DDES

Patented GB2100107.8 / PCT/IB2021/054494

Professional Wood Chippers

Introducing our flagship wood chippers, the pinnacle of power and performance. Designed specifically with professionals and commercial use in mind, our 9, 14, and 18 hp models are ideal for effortlessly shredding large wood volumes on a regular basis. Unmatched in the market for their size, these chippers combine raw power, ease of use, and exceptional manoeuvrability. Experience the ultimate wood chipping solution.

FM9DD

9 hp LCT Maxx 306cc 4 stroke engine. Capable of chipping wood up to a diameter of 75 mm (3 inch).

14 hp LCT Maxx 460cc 4 stroke engine. Capable of chipping wood up to a diameter of 100 mm (4 inch).

FM18DD

18 hp LCT Maxx 478cc 4 stroke engine. Capable of chipping wood up to a diameter of 125 mm (5 inch).

*Not suitable for transportation on public roads.

Patented GB2100107.8 / PCT/IB2021/054494

Professional Wood Chippers

This series enhances operational speed and efficiency while effortlessly adapting to various materials. Additionally, these chippers can be easily equipped with a mulching attachment, expanding their versatility for all your landscaping requirements.

FM9DD 9 hp Professional wood chipper

Professional Wood Chippers

Designed and tested here in the UK, our wood chippers and splitters are designed and manufactured with your needs in mind to be the ultimate in speed, power and efficiency.

Compact Garden Shredder Mulchers

Not sure if you require a garden mulcher or a wood chipper? This is a question of the past as our range of mulchers are designed to mulch all green material and garden waste as well as chipping wood into chips that are 10 mm and below.

If you're mulching material that is particularly wet or likes to stick to the chutes, the mulcher is designed so you can simply hose down these areas to clear out any excess material. Features a rotating drum mechanism that allows the discharge chute additional ground clearance.

Compact Garden Shredder Mulchers

Compact Garden Shredder Mulchers

FM4DDE-MUL

Compact, lightweight, yet impressively powerful and robust, the FM4DDE-MUL effortlessly handles a wide range of garden waste, transforming it into valuable mulch. This mulch is essential for creating highly effective compost, enriching your garden soil and promoting healthy plant growth.

Patented GB2100107.8 / PCT/IB2021/054494

Patented GB2100107.8 / PCT/IB2021/054494

FM6DD-MUL

The FM6DD-MUL is our high-performance mulcher, designed for large gardens and areas with limited access to electricity. The perfect blend of power and portability, makes this an ideal choice for your domestic mulching needs. Trust in our reliable one-stop solution to effortlessly transform garden waste into valuable mulch.

FM6DD-MUL

Available with an electric start engine.

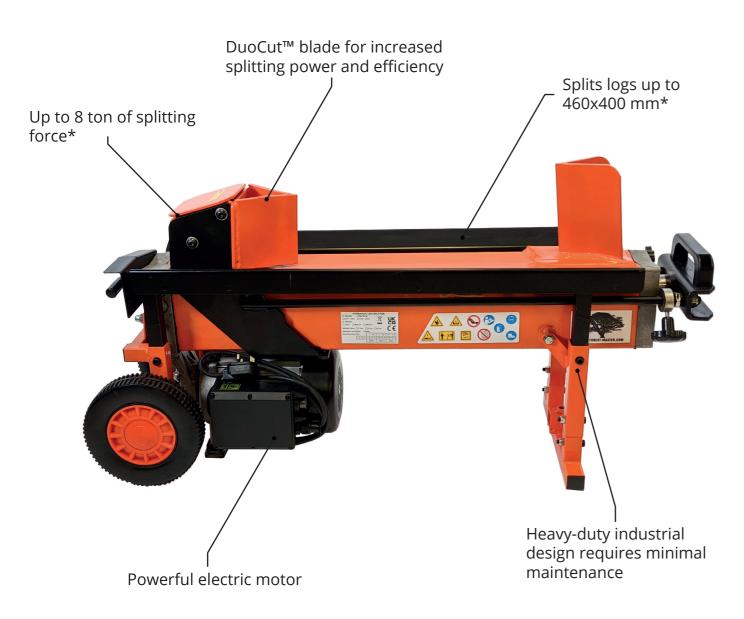

FM6DDES-MUL

Crafted with a versatile rotating drum, our Forest Master Mulchers adapt to your specific material-processing demands. Our unique 2-part discharge chute can be detached, boosting ground clearance up to 31 cm. Fitted for functionality, these mulchers adeptly manage various garden waste with simplicity and efficiency.

Hydraulic Log Splitters

Electric powered log splitters offer powerful and long-lasting use with minimal maintenance required. Our log splitters are also available with our patented DuoCut™ blade for increased efficiency, designed to split through tough and knotty wood. The Ram stop feature allows the user to drastically reduce cycle times when splitting shorter logs, simply engage the Ram stop to limit the return distance of the moving edge.

All log splitters are also available with a stand or stand with trolley castors for increased usability and portability. All splitters feature a workbench and safety guard as standard.

*See model table for technical data.

All hydraulic log splitters are also available with a stand (see p. 20).

FM5D-TC

Introducing our compact yet powerful log splitter, perfect for effortlessly splitting unseasoned (green) wood. With exceptional efficiency, it tackles logs up to 300 mm in length and 300 mm in diameter, making it ideal for small to medium wood burners. Experience unmatched performance in its price range and enjoy the convenience of easy log splitting.

FM8D-TC

With its enhanced capabilities, the FM8 effortlessly splits logs up to 370 mm in length and 300 mm in diameter, surpassing the performance of the FM5. Ideal for tackling larger wood sizes, the FM8 is a must-have for anyone seeking reliable performance and ease of use.

Hydraulic Log Splitters

FM10D-TC

Built to handle most domestic needs with 5-ton splitting power, this splitter effortlessly tackles logs up to 430 mm in length and 400 mm in diameter. Equipped with our trademarked DuoCut™ blade and Ram stop technology, to reduce cycle time and increase efficiency. Experience the perfect solution for hassle-free log splitting.

FM16D-TC

The FM16 is a professional-grade log splitter built to handle heavyduty tasks. It boasts an impressive 8 tons of splitting force, making it ideal for demanding jobs.

The DuoCut™ blade enhances its performance even further.

Featuring a two-speed 40 mm ram, this log splitter effortlessly tackles logs up to 460 mm long and 400 mm in diameter.

FM10D-7-TC

The FM10-7 is the ultimate heavy-duty choice for domestic use. With its impressive 7-ton splitting power and high-performance, it effortlessly handles both hard and soft wood. Equipped with all the same features as the FM10, this log splitter ensures reliable and efficient log splitting of logs up to 430 mm in length and 400 mm in diameter.

FMX4-PRO-D

Upgrade to the FMX4-PRO, our flagship hydraulic log splitter. Built with the same exceptional quality as the FM16, this model takes is up a notch by allowing the attachment of a cross cut or obtuse blade. Featuring a slimmer fixed blade, it amplifies the splitting force for simpler, effortless work. The FMX4-PRO is our top-of-the-line hydraulic log splitter, providing unmatched performance.

Hydraulic Log Splitters

This powerful tool can be fitted with a cross-cutting blade that can split logs into four pieces in a single go, doubling your efficiency.

For those stubborn, stringy logs that refuse to split, the Obtuse blade is the perfect solution. This versatility makes the FMX4-PRO a must-have. The FMX4-PRO also boasts a thinner fixed blade, increasing the splitting force and making even the toughest logs easy to split.

With its reliable performance and heavy duty design, the FMX4-PRO is the ultimate tool for anyone looking to take their log splitting to the next level.

4-WAY Cross-Cut Blade

Split a log into 4 pieces in a single motion. Make splitting up to twice as efficient with our cross cut blade.

This blade attachment is compatible with our FM8VE, Fast Fire Kinetic and FMX4-PRO log splitters.

OBTUSE Wide Angle Blade

This blade attachment is the ultimate tool for handling larger logs that are stringy and gnarly.

The attachment is compatible with our FM8VE, Fast Fire Kinetic and FMX4-PRO log splitters.

Eco through innovation, designed and developed here in the UK by our in-house team of engineers. Split anywhere, any time.

Introducing a revolutionary approach to log splitting. A combination of speed, portability, and environmental consciousness never seen before. Our battery-powered log splitters not only offer 30% faster ram speed than competitors, but also combine the convenience of traditional petrol splitters with the eco-friendliness of electric models.

What sets them apart is the option to charge the battery using a solar panel, achieving complete zero-emissions log splitting. Power them with a standard car battery or an upgraded battery for extended working time between charges. Experience the future of sustainable log splitting today.

Kinetic Log Splitters

Kinetic Log Splitters

Experience rapid, effortless log splitting with our Fast Fire Kinetic Log Splitters. Harnessing an impressive 8 tons of power, it can swiftly handle logs up to 520mm long and 400mm in diameter, fresh or seasoned. With petrol and electric options available, this versatile splitter offers unmatched speed and reliability, boasting an ultra-fast cycle time of just 3 seconds.

The Fast Fire Log Splitter embodies a remarkable combination of efficiency and advanced log splitting technology.

24

FM8FFE

Kinetic electric splitter capable of splitting a log every 3 seconds with a massive 8 ton of splitting power. Perfect for commercial or domestic use.

FM8FF-HTW

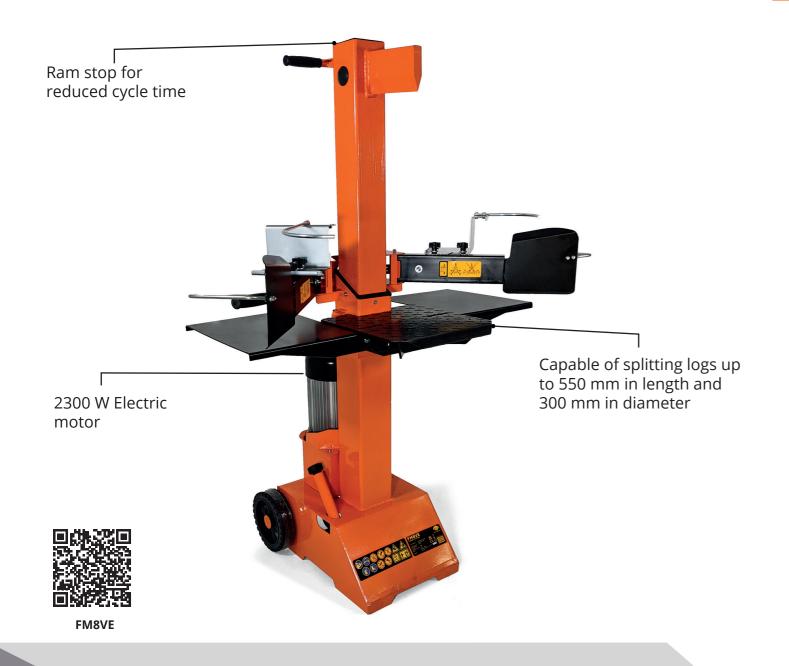

Kinetic Fast Fire splitter fitted with an ultra reliable 4-stroke Honda GX50 engine. Massive 8 ton of splitting power with the added benefit of portability due to the petrol engine.

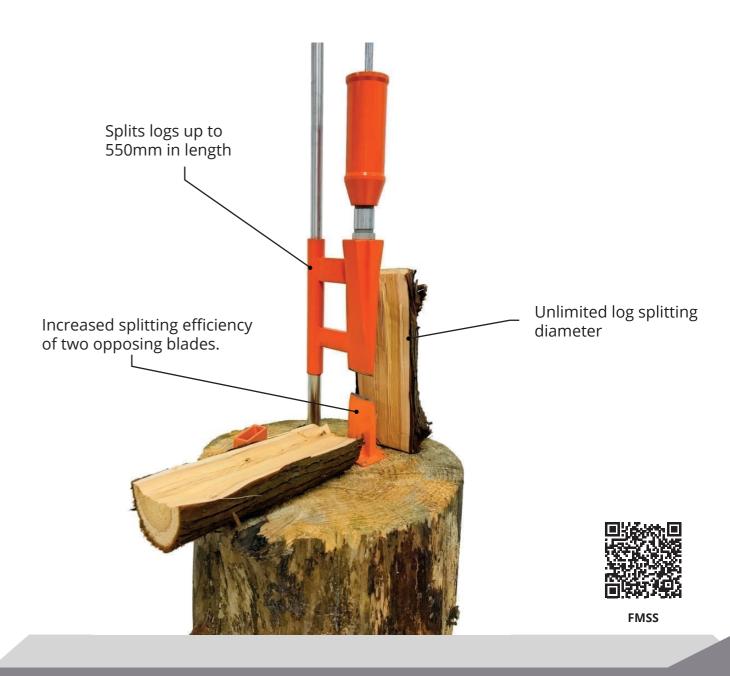

FM8VE Vertical Log Splitter

Manual Log Splitters

Fitted with the largest electric motor that can be used on a 3-pin plug our FM8VE is a sturdy vertical log splitter capable of splitting logs up to 550 mm in length. Armed with 8 ton of splitting power this vertical log splitter can easily split hard unseasoned wood with ease.

Our vertical log splitter offers effortless loading of large logs compared to horizontal models. It comfortably handles various log sizes, up to 300 mm in diameter and 550 mm in length. Experience convenience and versatility in log splitting with the FM8VE.

Discover the perfect solution for eco-conscious individuals or those who prefer a handson approach with our manual log splitters. Lighter, quieter, and easier to store than their electric or petrol counterparts, these manual splitters offer unmatched convenience. Our versatile manual splitters excel in any task, whether you need a heavy-duty splitter for hardwood or a lightweight and portable wedge for kindling.

The revolutionary Smart Splitter, weighing in at only 12 kg. Despite its lightweight design, it can effortlessly handle logs up to 550 mm in length. This multi-use tool is capable of splitting large, seasoned logs or quickly splitting kindling, all while ensuring safety. Say goodbye to the risks associated with axes or mallets and embrace the efficiency and peace of mind that our manual log splitters provide.

Manual Log Splitters

Manual Log Splitters

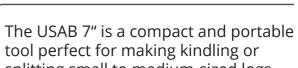

Experience effortless, ecofriendly log splitting with Forest Master's manual splitters. No electricity or petrol needed.

Compact, portable design ensures convenience and flexibility. Enjoy safe operation, solid build quality, minimal maintenance, and unique design to prevent jams when splitting.

Get yours today for a hasslefree, safe, efficient, and sustainable log splitting solution.

splitting small to medium-sized logs. With its ductile cast iron construction and alternating fins that prevent jams, the USAB offers both durability and efficiency. The one-piece cast ensures a solid base and easy fixing. Includes safety cover.

USAB

USBB

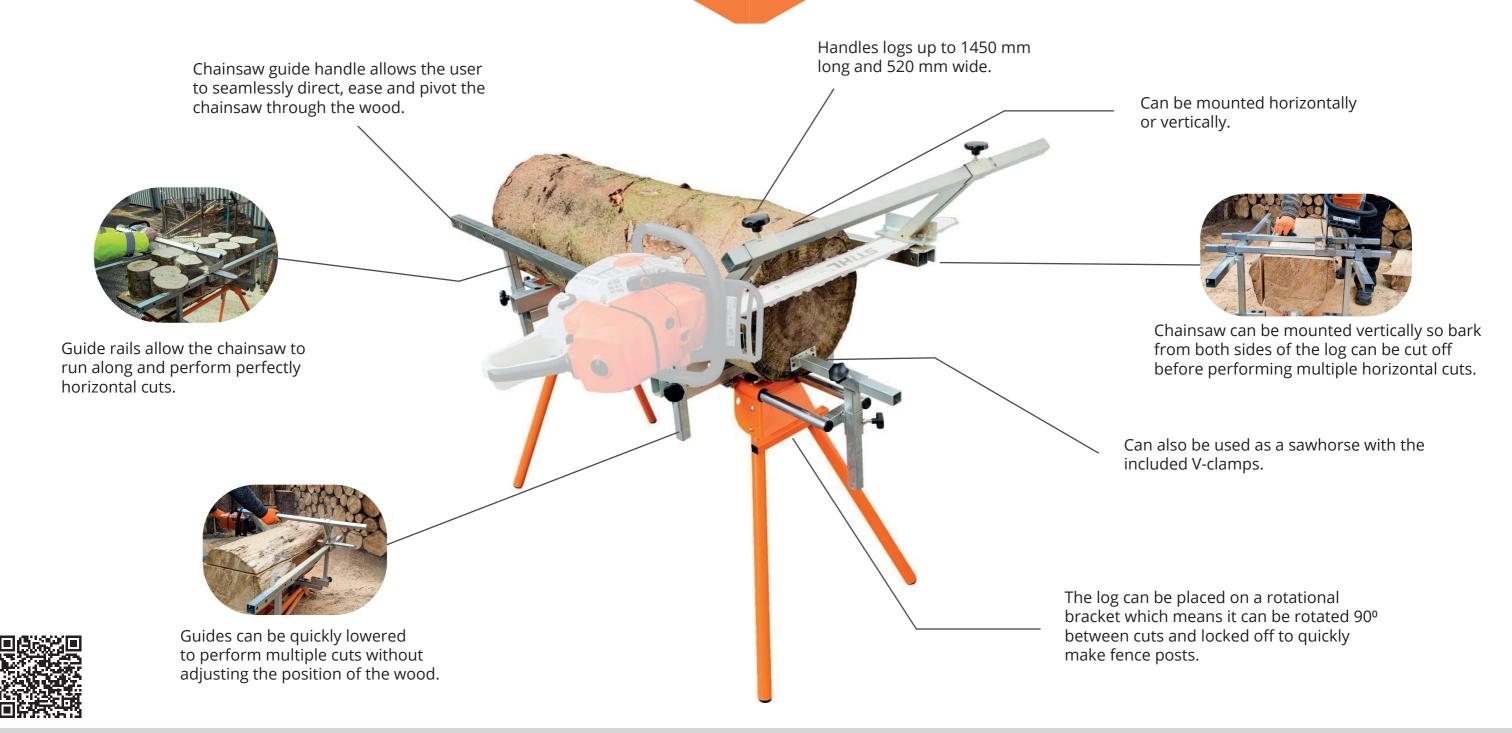

The USBB is a compact and portable tool, serving as a smaller version of the USAB. It excels at making kindling and splitting smaller logs with ease. Its one-piece cast design provides a solid base and convenient fixing, while a safety cover ensures user protection. Perfect for on-the-go wood splitting tasks.

Universal Woodworking Station

Universal Woodworking Station

The Forest Master Universal Woodworking Station (UWWS) is the ultimate tool for all your sawmill requirements, plus more, without breaking the bank. The Universal Woodworking Station bundles together a chainsaw sawmill, log sawhorse and a mitre saw workbench all together in one ultimate tool.

From setup to milling in just a few minutes, eliminate the time demanded to readjust the wood each time you want to perform a new cut. Simply readjust the height (which takes moments) and repeat the effective process until you produce all the accurately sized wood you need with a perfect finish.

Saw Horses & Lifting Tools

- Adjustable base spacing allowing the user to choose length of cuts
- Supplied with 3 up-right 'H' log supports
- Can hold a stack of logs up to 520 mm high

BLS-3H

- 2 in 1 Log lifter and Saw Horse
- Max log diameter for use
- Serrated jaws grip logs tightly and securely

• 3-in-1 Tool felling lever, farm

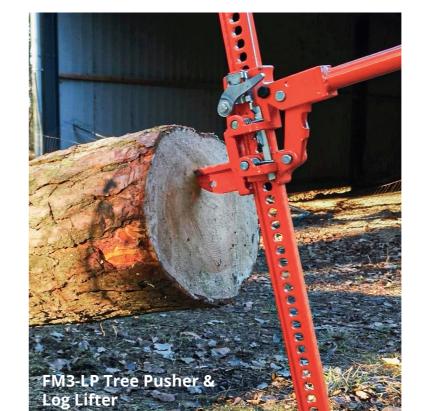

- when felling
- Reinforced cast iron capable of lifting 3 tons
- Must-have tool for every tree surgeon

FM3-LP

Saw Horses & Lifting Tools

- Supports logs up to 6 m
- Maximum log diameter 360 mm

- Quick load and release for maximum efficiency log cutting
- Independently pivoting teeth hold logs securely
- Max compatible log size 4 m Length x 250 mm Diameter

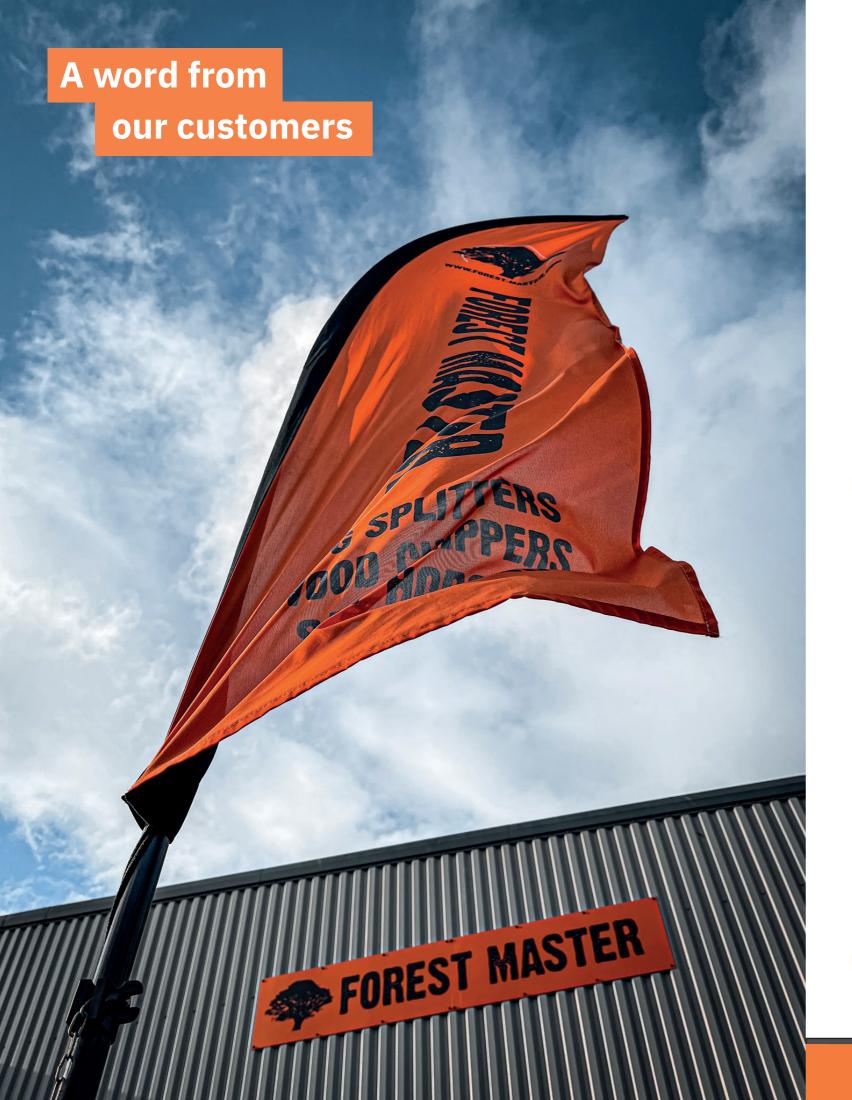

FM3-LP Tree Pusher &

Log Lifter

- Fits to any existing workbench
- Spiked jaws hold logs securely
- Fits bench tops between 15 mm – 25 mm thick

"

"I am a lady on her own using this for my domestic use only, but endeavouring to become more self sufficient. Your product gave me confidence I could use it myself, so I decided to purchase your wood splitter."

Mary Connelly Customer, Age 75

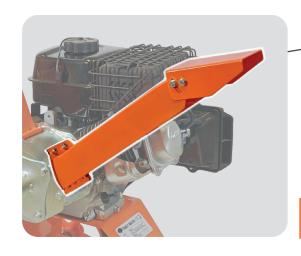

The FM6DD has quickly become one of my absolute essentials. Having such a portable yet powerful chipper to move around the garden allows me to quickly process prunings and create large volumes of woodchips to use for pathways, composting, and mulching. I regret not getting one sooner!

Huw Richards
