

# Ultimate Splitting Base Blade

Increased Efficiency

**1**

**2**

**3**

**4**

- 1 Base Blade assembly
- 2 Spacer Tube
- 3 No 5 wood screw x 4
- 4 Guide Pole
- 5 Blade Cover

## Operating Instructions

- 1 Place the base blade on the wood base to one side of the guide pole as shown above and align with the top blade, then screw in the 4 screws supplied, into the wooden base.
- 2 Always use the spacer tube supplied, this prevents the two blades from clashing and is a safety feature to prevent trapping of the operators hands. Never use without the tube.
- 3 When the blade is not in use, use the protective cover.
- 4 This base blade is designed to be used with fixed mounted log splitters.
- 5 To use, first engage the log with the top blade as explained in the Ultimate Log Splitter user manual then lift the top blade and log onto the base blade. Try to ensure the alignment of the blades is as close as possible.
- 6 Split the log with the weight in the normal manner.
